

Dear FCC officials;

I would greatly appreciate you not allowing the NAB petition 04-160 to be accepted. I appreciate the weather and traffic information, and I believe safety is of more concern than local interests. When I am in Atlanta and I hear of weather or traffic problems on my XM radio then I turn to the local stations (640am in this instance). I can not see where there is a problem with both stations broadcasting this helpful information. Thank you for your careful consideration of this issue.

Sincerely
David Rayburn
